Black Bile is the latest moniker for the long time musical venture of Henri Kuittinen. All songwriting is by Kuittinen, who also handles the duties of vocals, guitar, and programming, both live and on the album. In its current state Black Bile operates as a quintet.

Black Bile's debut album Great Ape Language was recorded in Hämeenlinna at Sound Supreme studios. Producer Janne Saksa has also worked with Turisas, Rotten Sound and Battlelore. The album was mastered by Mika Jussila at Finnvox. The album was released in Finland in April 2008.

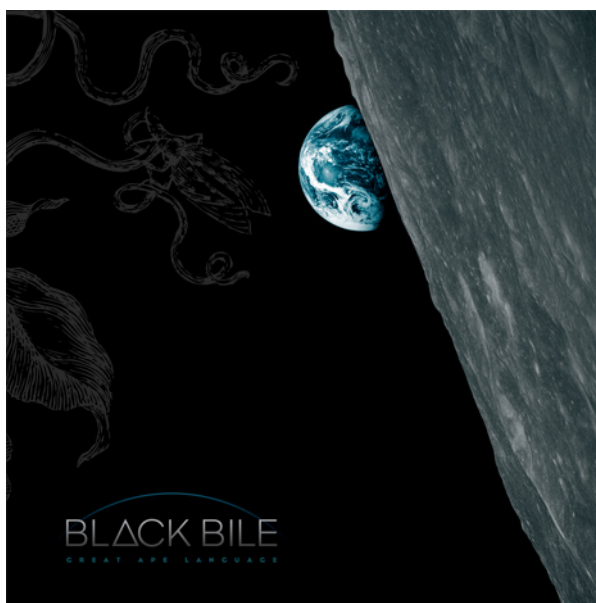

Finland's leading metal online magazine Imperiumi.net review gave Great Ape Language 8,5/10 and described Black Bile's musical elements as follows: "Melancholic and melodic metal could be taken from Katatonia, ultimately heavy atmosphere from Jesu and Neurosis, and programmed soundscapes from Skinny Puppy - without forgetting the thrash roots."

The name of the band refers to the Greek word for melancholy, melas (black) kholé (bile). According to the then prevalent medical theory of the four humours, an excess of black bile in a person caused the person to become melancholic. A healthy person would have the four humours - black and yellow bile, blood, and phlegm - balanced.
